

Delaware Tech's "Can-Do" Attitude

STANTON - As part of its 50th Anniversary celebration, Delaware Tech partnered with the Food Bank of Delaware and the General Assembly to donate food to the Food Bank during a time of great need. Each year, the Food Bank of Delaware does tremendous work soliciting donations and distributing millions of pounds of food to Delawareans in need. Historically, the months of January, February and March have been the time of the lowest food donations to the Food Bank of Delaware. These months are also generally the coldest months of the year, when the services of the Food Bank of Delaware are called on even more to lend support.

Delaware Tech employees across the state came together to donate 5,000 pounds of food (that's about 5,000 cans!). In addition, students at the Stanton Campus decided to enter the Food Bank of Delaware's CANgineering competition for the opportunity to earn additional funds for the cause. CANgineering is a competition amongst Delaware organizations to create structures out of food items collected. The exercise encourages teamwork, camaraderie and creativity, all while working to make a difference in the community.

Under the leadership of engineering instructor Amy Mann, a team of students built a structure made out of over 500 food items to commemorate Delaware Tech's 50th anniversary.

Congratulations to the CANgineering team and all of the Delaware Tech community who contributed food for this worthy cause!
